

VEHICLE MAINTENANCE AND SAFETY CHECK

Printed Student Name: _____

Date: _____

Directions: Have an adult **help** you do the following maintenance activities on the vehicle you will be driving:

1. Change, remove and replace the tire on a vehicle.
2. Perform a check of all systems to make sure the vehicle is in working order and safe to operate.
 - Locate registration and insurance information.
 - All lights and signals – inside and out
 - Tire condition
 - Engine condition
 - All fluid levels including the oil, windshield washer fluid, coolant, brake fluid, transmission fluid (if possible), any other fluids easily checked in your car.
3. Safety supplies – jumper cables, flares/reflectors, first aid kit, winter/summer emergency supplies etc.

I attest to the fact that my son/daughter has changed a tire and performed a vehicle systems inspection on the vehicle they will be driving most frequently.
